

Recycling – Construction & Demolition Debris

Acceptable:

Construction items and lumber larger than 4 feet (these should not be placed in household waste compactor); asphalt shingles, sheet rock, plywood

Not Acceptable:

Paint

How and where to recycle:

Please contact an attendant before disposing in this container. Place items in Construction and Demolition (C&D) bin located behind the three attendant sheds as you exit the Transfer Station (Location 15).

Recycling information:

This is the most expensive trash to dispose of for the Transfer Station.

Residents may use this C&D bin to dispose of construction materials that are too large for the solid waste compactor.

Please speak with a staff member at the Transfer Station if you are not sure what to put in the C&D container.

Contractors will make payment to the Town of Carlisle for access to the C&D container.
