

## Recycling – Cell Phones

Carlisle does not recycle most electronics – it is strongly recommended that you bring your old electronics (especially computers & printers) to a local retailer who recycles them. An excellent local choice is Staples in Acton which accepts most electronics at no charge and often issues a \$5 or \$ 10 store credit. This is best for both Carlisle and the environment by assuring optimal recycling of these items and removing them from the solid waste stream.

**CELL PHONES** - Please don't throw them in the trash or leave them in the Swap Shop. If they are not in good working order, bring to Gleason Library or a Best Buy store for safe recycling. If they are in good working order, they might be repurposed.
