

Recycling – Electronic Media

Carlisle does not recycle most electronics – it is strongly recommended that you bring your old electronics (especially computers & printers) to a local retailer who recycles them. An excellent local choice is Staples in Acton which accepts most electronics at no charge and often issues a \$5 or \$ 10 store credit. This is best for both Carlisle and the environment by assuring optimal recycling of these items and removing them from the solid waste stream.

Electronic Media and Accessories - Please bring your old media, cables, small electronic devices to the Swap Shop and place in the marked section.
