

Master Box Console

Vision 21 Master Box replacement

- Vision 21 system located in the dispatch center (at the Police Station)
- Decodes fire alarm boxes coming from major buildings in town
 - The town has several 100mA wired circuits for the master boxes at schools, churches, and other major town buildings. These can be operated manually or by the alarm systems in the building.
 - You can decode the master box yourself by listening to the horn and looking up the code on the red sheet you keep on your refrigerator!
- Interfaces with radio box receiver
- Current system no longer in production and boards are no longer available. If needed, repairs are component level replacement on the boards.
